

PRODUCT DATA SHEET

RADIATOR STOP LEAK Stop It Additive

Code:716

RADIATOR STOP LEAK is a water based product containing an advanced additive system to help stop leaks in cooling systems.

SPECIFICATIONS

RADIATOR STOP LEAK meets or exceeds the following specifications.

- N/A

APPLICATIONS

RADIATOR STOP LEAK has been designed to plug leaks in automotive cooling systems and heater cores.

RADIATOR STOP LEAK contains corrosion inhibitors and tiny organic fibrous materials that react to heat and air, then they congeal and penetrate, harden and seal around the point where leakage is occurring.

RADIATOR STOP LEAK is effective on all radiators and is compatible with cooling system materials including rubber components, gaskets and other coolants.

RADIATOR STOP LEAK will not repair major breakdown or sealing of cylinder head gaskets in the combustion chamber area. The temperature and pressure are too great for this to create an effective seal.

DIRECTIONS:

350 Mil bottle will treat up to a 10 litre cooling system.

Add contents very slowly with the engine running at operating temperature, failure to do this could cause some the radiator core to stop circulating.

HARMFUL, KEEP OUT OF REACH OF CHILDREN, IF SWALLOWED SEEK MEDICAL ADVISE. AVOID CONTACT WITH SKIN AND EYES.

TYPICAL MAIN CHARACTERISTICS

CHARACTERISTICS

Appearance	Slimy hazy liquid
Specific Gravity (Kg/L)	1.4 Typical
pH Value	12 Typical

PACKAGE SIZE 350 Mil
